NOTIFICATION

**Scheme of Studies of Bachelor of Science (BS) in
Power Engineering, BS(PE)**

It is hereby notified that the Academic Council in its 13th Meeting held on June 04, 2012 approved the following scheme of studies for Bachelor of Science (BS) in Power Engineering, BS(PE) with effect from Fall 2012 at CIIT system:

The launching of the program is subject to approval from Pakistan Engineering Council.

i.	Minimum Duration:	04 Years
ii.	Minimum No of Semesters	08
iii.	No of Credit Hours in each Semester:	13-19
iv.	Core Courses:	
a.	Engineering Courses (List Attached)	21
b.	Non-Engineering Courses(List Attached)	12
v.	Elective Courses:	
c.	Major Electives*(I, II, III, V)	4
d.	EE Open Elective I***/Major Elective IV*	1
e.	EE Open Elective II ***	1
f.	Interdisciplinary Elective****	1
g.	Non-Engineering Elective	1
vi.	Total No of Courses:	40
vii.	Total No of Credit Hours:	133-140 Credit Hours

Note:

The Regulations relating to Undergraduate Degree Programs approved by the Competent Authority and amended from time to time shall also be applicable to this program.

This issues with the approval of the Competent Authority.

¹ 3 credit hours of theory is equivalent to 3 hours of lectures whereas 1 credit hour of lab is equivalent to 3 hours of lab session. All the lab sessions are graded. Students have to pass both theory and lab to earn the course credits.

† Courses with prerequisites can only be allowed if all prerequisite courses have been passed.

** Students must clear all the engineering subjects in the first five semesters, as given in the tentative plan to be eligible for the Final year project

*** With the consent of Academic Advisor, Project Supervisor, Course Instructor or HoD, the students can take any approved course of EE which he/she has not taken before according to his/her aptitude and/or future plans.

**** With the advice and consent of the Department, the student may select interdisciplinary elective course from the list of courses and the student may select any approved course of EE, which he/she has not taken before.

Note: The list of Electives may be revised from time to time and will be offered by the department subject to the availability of the faculty.

Bachelor of Science in Power Engineering

Introduction

Power Engineering is a subset of Electrical Engineering that focuses on the generation, transmission and distribution of electric power as well as the electrical devices. It is estimated by studies conducted in the field that in the next five to ten years the scarcity of power engineers will reach a critical stage. In many countries including the developed countries the shortage of power engineers is felt acutely. With this scenario in mind and the inevitable addition of more power houses to be set up in Pakistan, we feel that there is greater and urgent need for offering electrical power engineering as an undergraduate degree program.

The curriculum of Bachelor of Science in Electrical Engineering is developed with the objective to facilitate the teaching of common core courses and selection of courses of Power Engineering

Program Objectives:

The objective of this program is:

- To equip students with the sound knowledge of Power Engineering
- To produce well-trained, skilled and efficient professional engineers
- To develop their communication skills
- To develop their analysis, synthesis and design skills
- To produce graduates with the necessary background and technical skills to work professionally in one or more of the following areas: Power, Telecommunication, Electronics, Computer and Control
- To prepare graduates who are capable of entering and succeeding in an advanced degree program in their field of study
- To create an excellent environment for research and development activities

Program Outcomes:

The graduates of the program will:

- Possess essential engineering knowledge of the electrical power industry regarding generation, transmission, distribution and electrical machines for meeting the requirements of industries and other organizations needing graduate engineers
- Do planning, specification, design, implementation, and operation of systems
- Be able to apply engineering knowledge, mathematical tools and probabilistic/statistical methods to solve technical problems
- Function effectively in a multi-disciplinary team
